

Crimson Tide, a Tunbridge Wells based technology firm, leads the way in top Technology Graduate career development

A recent survey conducted by ONS, identified Tunbridge Wells as one of the UK's leading employers in the 'knowledge economy' with an impressive 32.9%. The main attractions are close links to London, a variety of leisure activities and of course numerous entertainment & shopping facilities.

So where can top technology graduates look to start developing their career in this town? The answer is: at Crimson Tide.

"Working at Crimson Tide in TW gives me a better quality of life and I wouldn't change that!" says Luke Jeffrey, who started at Crimson Tide 12 years ago as a Junior Developer, after obtaining a BSc in Business Information Systems & MSc in Computing Science at the University of East Anglia (UEA). Luke is now the Deputy CEO.

His story is not the only one.

"I started off in an admin role, but the company description sounded interesting and different to what else was being advertised. I've now moved into a much more technical role as the company has developed." Says Alex Grogan, a UCL Graduate in Archaeology BA, Skeletal and Dental Bioarchaeology MSc. Alex is one of our Configuration Support Analysts.

Crimson Tide offers tech-savvy graduates a fast-paced working environment; where new technologies are continually being adopted, thereby offering many new challenges to all our developers. As our mpro5 platform brings a diverse range of functionality across so many verticals, there are always new and exciting development projects to work on.

As a rapidly expanding business, we are now on the search for talented individuals who are looking to either start, or continue to grow their career. Visit our website to find out more about mpro5 and send your CV to grads@crimsontide.co.uk to find out the exciting opportunities we can offer you.
