

## mpro5 Product Descriptions

SKU	Name	Product description
<b>Core Licensing</b>		
mproGO	mpro5 Core Solution	mpro5 core solution is required as a minimum of an engagement. This includes all hosting, support and configuration of the system and access to both the web and mobile platform. An appropriate number of site or user licenses will also be required and any additional modules will be added to this.
mproENT	mpro5 Enterprise Core License	mpro5 core solution for enterprise level clients including hosting, support, service and unlimited web users. Requires appropriate number of site or user licenses to run and must be subscribed to in conjunction with a separate UAT instance
mproSITE	mpro5 Site License	Additional to the mpro5 core license. To cover an individual site/location/store, with a maximum user number cap specified per site.
mprouser	mpro5 User	mpro5 user licence for use in conjunction with your mpro5 core license and any other modules
mprouserocc	mpro5 Occasional/Limited User	A limited or infrequent user of mpro5 (eg. no job functionality/maximum of 12 log ins per year)
<b>IoT Licensing</b>		
5ThingsENV	mpro5 IoT Module	Licensing the mpro5 core module for IoT enablement to allow for IoT smart sensors to be integrated into the platform and workflows (inc 1 x IoT Site License)
5ThingsSITE	IoT Site License	Available to cover an individual site for mpro5 IoT deployments. Sensors from the site can direct feed into the mpro5 core license and interact with the mpro5 users (inc. 50 sensors connectors)
5ThingsSENSE	IoT Sensor Connector License	Required for each sensor deployed in conjunction with the mpro5 core license and IoT module, may also require a monthly data processing fee
<b>Integration Licensing</b>		
5Connect1	1 Way Integration Support	Additional to mpro5 core license. This enables access to the the OpenAPI and includes support for a 1-way Integration to a 3rd party system all data fees, access to documentation and support.
5Connect2	2 Way Integration Support	Additional to mpro5 core license. This enables access to the the OpenAPI and includes support for a 2-way Integration to a 3rd party system all data fees, access to documentation and support.

5connectSSO	Integration to SSO Support	Support for SSO Integration to an active directory solution includes all data fees, access to documentation and support. Please note that SSO may be a pre-requisite for some deployments.
<b>Time and Attendance Licensing</b>		
mproT&A	mpro5 Time and Attendance Module	Additional to the mpro5 Core License, to enable time & attendance data collection through any mpro5 enabled means (Facial Recognition, Finger Print, Pin Number, QR Scan) includes the initial 200 users. Additional hardware maybe required.
mproT&AU	mpro5 T&A 200 User Pack	Pack of 200 Time and Attendance Users for us with the mpro5 Time and Attendance Module
<b>Other Modules</b>		
mproDASH	Dashboard Subscription	Additional to the mpro5 core license. Enabled custom analytics and visualisation capabilities (supplemental to the basic reporting available in the core license). Includes hosting, licensing for the BI Platform and access to the analytics team. Please note that the building of dashboard and report templates are subject to professional services fees.
mproCP	mpro5 Customer Portal	A customer portal for your client's to view any data available within the mpro5 solution.
mpro5env	Client Additional mpro5 Environment	An additional production environment for an existing client which has reduced cost as elements of the service are already commercially covered. Example uses for this product line would be a secondary business unit that requires data segregation from other areas.
mproUAT	mpro5 UAT environment	A testing environment mirroring your live deployment delivering a completely physically (as opposed to logical separation within the same hosted environment). Otherwise known as a "sandbox" area for user acceptance testing and pre-deployment sign off configuration changes. Please note that a UAT environment may be a pre-requisite for some deployments.
<b>One-off Fees and Charges</b>		
mpro5-mob	Mobilisation/Implementation Fee	The mobilisation fee covers the initial deployment of your mpro5 solution including all project management, system architecture design and hypercare for your initial go live.
mproDEV	Development Day	A SCRUM day for any professional services from our development or analytics team
Tags	NFC/QR Tags	Dual NFC/QR Tags for use with the mpro5 Solution
